

## **BUILDING CONCRETE ESTIMATOR**

---

Plote Construction is seeking a concrete estimator to work within our private work group. The ideal candidate will possess at least five years' experience in commercial concrete construction. Experience with large scale warehouse slab on grade construction is a requirement.

### **Major Duties and Responsibilities:**

- Engage in preconstruction efforts to secure self-perform concrete scopes of work.
- Produce and complete detailed estimates for large scale slab placements
- Unique attention to details and extensive communication with the project teams.
- Create proposals with detailed specific clarifications, inclusions and exclusions.
- Read and interpret bid documents, construction plans, schedules and specifications.
- Provide constructability comments and preconstruction pour plans.
- Attend internal/external meetings for review of costs and ideas to bring projects in on budget.
- Handle multiple project estimates on tight deadlines.
- Track project data for historical productions and costs.

### **Required Skill/Knowledge**

- 5 years of experience in commercial concrete construction
- Strong work ethic that delivers on promises.
- Must lead by example: be accountable, reliable and organized.
- Team player that seeks and accepts performance feedback.
- Flexible, detail-oriented individual with the ability to manage multiple estimates while consistently producing quality results and meeting deadlines.
- Solid understanding of concrete construction, processes, systems and codes.
- Experienced in estimating labor, materials, equipment, general conditions, and risk.
- Proficient in estimating software: HCSS Heavybid.
- Proficient in Microsoft Office Suite.
- Proficient in Bluebeam.
