

Plote Construction is seeking a **Concrete Estimator** to work within our private work group.

#### Job Responsibilities

- Engage in preconstruction efforts to secure self-perform concrete scopes of work.
- Produce and complete detailed estimates for large scale slab placements
- Unique attention to details and extensive communication with the project teams.
- Create proposals with detailed specific clarifications, inclusions and exclusions.
- Read and interpret bid documents, construction plans, schedules and specifications.
- Provide constructability comments and preconstruction pour plans.
- Attend internal/external meetings for review of costs and ideas to bring projects in on budget.
- Handle multiple project estimates on tight deadlines.
- Track project data for historical productions and costs.

#### Job Qualifications

- Five plus years of proven experience in commercial concrete construction.
- Experience with large scale warehouse slab on grade construction required.
- Must share in Plote Construction's core values.
- Strong work ethic that delivers on promises.
- Must lead by example: be accountable, reliable and organized.
- Flexible, detail-oriented individual with the ability to manage multiple estimates while consistently producing quality results and meeting deadlines.
- Solid understanding of concrete construction, processes, systems and codes.
- Experienced in estimating labor, materials, equipment, general conditions, and risk.
- Proficient in estimating software: HCSS Heavybid.
- Proficient in Microsoft Office Suite.
- Proficient in Bluebeam.
